

Project

- ❑ Cardiac auscultation is one of the most cost-effective techniques used to detect and identify many heart conditions
- ❑ Download *The CirCor DigiScope Dataset: From Murmur Detection to Murmur Classification*, <https://ieeexplore.ieee.org/document/9658215>
- ❑ Employ a Deep learning method to address the classification task.
- ❑ Prepare a report to present your model, the achieved results and they compare to the state of the art.
